ADVANCE ON RICHMOND

ACTIVE OPERATIONS.

General Grant Moving Upon the Rebel Works.

GENERAL HANCOCK TAKES THE LEAD.

Left Wing Advances Fifteen Miles,

THREE HUNDRED PRISONERS CAPTURED.

Etc., Etc., Etc., Etc., Etc., Etc., Etc.,

In run Proud, October 27, S.P. M. - The land looked for advance of the armies operating against Richmond has at last taken place.

Yesterday, the final preparations were comthe Army of the Potomac from the trenches, and moving it in the roat, made the the move-

The let Division of the 24 Corps, with a part of the 5th and 9th Corps, held the cutire line from the Appainactox on the right, to some three miles west of the Wolden road on the left. All wagons, buggage, etc., were sent to the reas a

At 2 o'clock this morning the next Hancock with the 2d and 3d Divisions of his Corps, moved along the Vaughan road, ranning southwest, and after crossing Hatcher's Runffound the Rebuls intrenched in newly made works. He at ones charged them on the flank and drove, the enemy out and took some twenty prisoners, mostly cavalry, among whom! was Major Venable, an acting Adjutant-General, but on what General's staff he would not tell. The 5th Corps took the Squirrel Level road,

and found the enemy posted at its junction with the Duncan road, which runs north from the Vaughan road to the Boynton road.

From this they were driven by our skirmishers, with some loss, the 1st Division having about forty wounded in the affair,

The 3d Division of the corps took the advance, and crossing Hatcher's Run, connected with the

In the meantline, General Hancock advanced along a byroad, driving the enemy before him till he reached the Boynton plank road, where the column halted and formed in line of battle on the farm of Mrs. Butler, the left reaching some distance west of the road, and the right extending to a thick woods on the right.

The 5th Corps had also formed and advanced through the woods two miles, but the left of the line failed to connect with the right of the 2d Corps. The enemy fell back as we advanced until the line reached Hatcher's Run again, when the Rebels were found behind strong intrenchments, and brisk firing ensued, but without much

loss to either side. At about 4 o'clock in the afternoon the enemy, taking advantage of the break in the line between the 2d and 5th Corps, massed Anderson's Division of Hill's Corps, and charged the right wing of the 2d, which gave way and fell back short distance; but being reinforced, the latter charged and captured a number of prisoners.

A few minutes after, the enemy's cavalry, which had been cut off on the Boyston road, made an attack on Gregg's Division, directly in the rear of the 2d Corps, and for a time quite a sharp-skirmish was kept up. General Gregg dismounted some of his men and finally drove them

In the charge made on the 2d Corps, two guns were said to have been taken by the enemy, but

they were subsequently recaptured. Fighting continued at this part of the line till after dark, when a heavy rain-storm set in, putting an end to the fighting for the day.

The 9th Corps occupied the right of the advance, but did not gain much ground, the object being to allow the left to get fairly around on the Boynton plank road. The colored division of the 9th had some skirmishing with the enemy, but nothing approaching a light.

They lost a few wounded. Gregg's Cavalry had a sharp fight with the Rebels in the forenoon when they attacked the rear of his column. He charged and drove them back, capturing a number of prisoners, and eight or ten wagons loaded with supplies, flogether with the horses, mules, etc.

The troops that occupied the country over which we passed to-day were Boreler's and Young's Divisions of South Carolina and Georgia troops, with part of Wilcox's Brigado. The left wing gained about difteen miles of

country to-day, and is now in a position to attack the enemy's works on the flank. i General Warren had a narrow escape. While

riding along the line to-day, a ball grazed his cheek and made a slight wound. October 28, 74 A. M .- The number of prisoners taken yesterday was about 300.

Late last evening, some Rebei cavalry captured three or four ambulances, belonging to the 5th Corps, which got on the wrong road.

## LATIST FROM THE SOUTH.

Washington, October 29 .- Richmond dates of last Wednesday received here, give the following summary of news from the "Confederacy" :-General Bragg has taken command at Wilmignton, N. C.

Barly has issued a long address to his army, congratulating them upon their late victory at Gedar creek on the morning of the 19th and attributes the subsequent disaster to the propensity of both troops and officers to desert their colors for the purpose of plundering abandoned property of the enemy. He appeals to them to retrieve their good name by being more ob dient to their officers. Rebel editors are confident that Grant will

make a demonstration near Petersburg before election day. Hood's army is reported as being rapidly rein-

forced, but Beauregard is not to succeed him in active command. Nothing later than Grant's despatch of this morning has been received from the Army of the

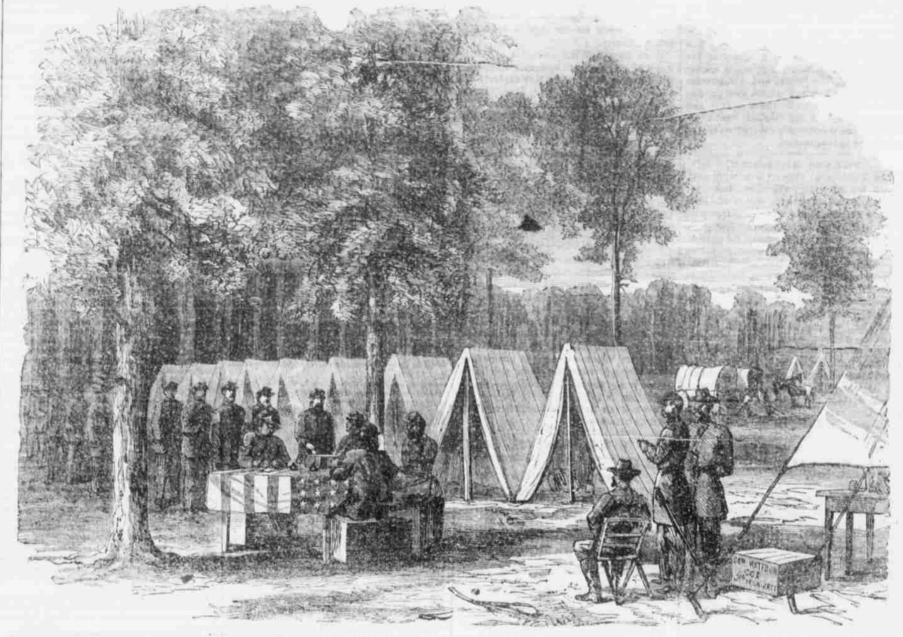

Potomac. All rumors of disasters to our arms are malicions falschoods.

Arrival of Steamers at New York. NEW YORK, October 28 .- The steamer Wester Metropolis, from Fortress Monroe, brings 360 sick

and wounded soldiers from the front. The steamer Santa Martha, from Carthagens and Kingston, Jamaica, arrived at this port

The steamer Empire City, from New Orloans on the 22d, has arrived. The steamer Albany, from City Point, brings 116 men of the 10th United States Infantry.

FINDING OF THE COURT.

The Culprits to be Imprisoned for Five Years.

Special to The Evening Telegraph.

Washington, October 29,--1: is rumored that the finding of the Court in the case of the Baltimore forgories of the soldiers' votes is five years in the State Prison. Colonel North, the State Agent here, will probably soon be released. Secessionists here are crocking over Grant's reconnoissance, claiming that it was a fallure. There are no grounds for such a statement.

Email, or Framel of Paris.

The defense set up was that the Enamel had failed to change her complexion—a conent of sallowness, spangled with pudding stone pimples—to the reseate hue and alabaster surface of youth. But old Jared, a deformed, quasimodish character, stoutly affirmed that his Email de l'aris was used by all the beauties in the realm, including the Empress. as used by an time beauties in the realm, in uding the Empress. and others spoke. VIOLATION OF THE HEATTH OBSTRANCE .-This morning, between 3 and a water h, a carrload of affed from the dimenting quart of one or car Medical Colleges was coupled upon a fee at Ninth and Dickerson suecis. The offsi consisted of logs, arms, and other portions of the human body, and created an intense excitement in the neighborhood. The duty of the man having them in charge was to excite they were properly buried, as is customary. Why they were thrown on an open let no one knows. The matter was reported to the Board of Hoalth.

Assault and Battery.-This morning William Bull was before Alderman Carter, charged with committing an assault and battery upon with committing an areas at and battery upon John Little, at the residence of the latter, on German street, below Third. The cause of the affair grew out of an intimacy between Bull and Little's wife. Little caught Bull at his house her night, and made an assault on him. Bull being a large matt soon overpowered Little, and hear him rather badly. The former was arrested and held to answer. Little's wife was also held to answer the charge of adultery.

answer the charge of adultery. "MONEY THE ROOT OF ALL EVIL."-Judge Allison has committed two children of a soldier to the Northern Home for Friendless Children. It was proved that their mother had received solo of her husband's bounty money, and, like many others unused to having so much cash at their disposal got into habits of dissipation, squandered it all, abandoned her offspring, and took up her abode in Ball alley. Fortunately for the children, they could not have been better provided for under the circumstances.

MILITARY FUNERAL.-The funeral of John B. Kohler, late commanding officer of the 98th Regiment Pennsylvania Volunteers, will take place to-morrow afternoon, from his late residence, in Coates street. The deceased was much beloved by his men, and they tell a number of incidents of his fearless courage in advancing in the face of the enemy, with the flag of the regiment in his own hands.

THE FASHIONS .- No one can walk through any of our mammoth establishments that minister to the wants of the fashion ble world, without coming to the conclusion that expense is the order of the day. The shelves and counters groun under the load of inxuries pilet up or temptingly dis-played—taffetas, soft and instrous lases that a preath might raffle, and exquisite poplins, regal-velyets, and shawis that a queen might be around to don. On one side is an array of graceful lacking opera-cloake—tome white as a snow bild, others red as a flamingo and on the other; arrans that would puzzle a liighlander to assign to any clan in all broad Scotland—plaids such as were never seen on trace or heather, mountain or murifand, but picturesque and striking neverthe.

were never seen on brue or heather, monutain or muirland, but picturesque and striking, nevertheless, and admirably calculated to brighten up a winter promonade on Broadway or Fifth avenue, and contrast pleusantly with sombre skies and snowy streets.

The rape for expense is not only shown in the quality of goods hought, but in the exuberance of trimming used. Never was there such a mania for trimming of all kinds amove. In many lestances the dress, like the frame of a bounct, is inating for froming of all kinds as now. In many isstances the dress, like the frame of a bounet, is only the ground on which to work, being over laid with frimming in every conceivable, or rather necessary the variety of designs—some odd, some elegant, and not a few outre in the extreme. When it is remembered that this to be is not confined to the waist and sleeves, but takes the flowing amplitude of the skirt for its ground of operations, we can form some idea of the expense

Os hionable shops, milling and such like, have given themselves up to the mania of high prices with an absancian which is fearfully admirable. A lady's bounst—a little piece of velvet and flowers to cap the climax—now costs one hundred dollars, and cannot be manufactured fiest enough to supply the demand. Silks, satins, and taces now cost their weight in greenbacks. Gloves are worth what was formerly considered a week's salary for many people, while other styles of cress have increased in like ratio. The wonder of it all is that, spite-of the high price, the consumption is greater than ever. But never he fore was the goneral expenditure of the citizens. before was the general expenditure of the cirizen or this metropolis so liberal, so extravagnat.

MAN THAPS. - One may cross our streets without being knocked down by fast-driven horses, one is in constant danger of being either maimed not mention, but which locality ought to be known to the police, there is a house to which a cell architched is statehed. This kitchen is some ten feet below the level of the parement. The ten feet below the level of the pavement. The sidewalk is very narrow, and there being no quard in the shape of railing around this said cell ar-kitchen, at hight one is in danger of being precipitated into the opening. ## FINANCE AND COMMERCE.

The New York Petroleum Exchange has been fully organized, and will commence operations on Tuesday next, November 1. This association banking houses in New York, and has met with a success as great as the petroleum interest itself. The list of members of the Exchange embraces the names of nearly all the leading capitalists and stock-brokers of that city; and we predict, from what we learn, that it will be one of the largest business institutions in the country, and that in a very short period the transactions at that Board will rival, if not exceed, the daily amount of sales at the regular Stock Board of

The extraordinary amount of business done in New York, Philadelphia, Boston, and Baltimore in petroleum requires such an organication, not only there but in this city; and we are only sur-prised that some of our enterprising oil men have not started an Oll Board in Philadelphia long ago. The formation of Oil Stock Companies and the development of the wonderful regions of Western Pennsylvania, Virginia, Ohio, and Kentucky, originated here; and at this time we have upwards of one hundred companies in Philadelphia alone, most of which are reliable, dividend-paying concerns. New York next caught the fever; and while the companies there, as a general thing, have larger capitals, experience is hourly proving that they are mostly as reliable as our own, and the dividends as certain. The investments in oils are very large there and here, and while the staid and scrutinizing capitalists at first doubted these securities, they are now the largest operators in petroleum stocks. facilities than ever for safe investments, as we are nformed by a member of the Executive Com-

mittee of that body that the stock of no company

will be sold at the Board except these which

show conclusively that they are sound, and have

and will pay regular dividends as long, at least,

abroad, it is likely to become even more stable

than cotton, or any other production of our wonderfully proline country.

Many of the companies in this city will have their stocks introduced in the New York Board on Tuesday. Among them the Dens nore, Dalell, McElheny, McClintockville, Noble and Delamater, and others; and many more will soon be bought and sold there. Any reliable company that can satisfactorily answer the interrogatories of the committee, and will pay two hundred and fifty dollars, can have their stocks operated in there. The PrestJent of the Board is Mr. Famuel B. Hard, President of the Open Stock Board of New Yorks
